EDUCATION

Syracuse University

Master of Science in Computer Engineering - GPA : 3.6/4

Syracuse, NY

Aug 2022 – May 2024

PESIT Bangalore South Campus

Bachelor of Engineering in Electronics

Bangalore, India

Aug 2015 – Aug 2019

EXPERIENCE

Software Engineer 2

Oct 2024 – Present

Medifast

Seattle, WA

- Building and maintaining **business-critical full-stack applications**, developing robust frontend interfaces using React.js, Tailwind, and TypeScript, and backend APIs using Node.js, AWS Lambda, Amazon Redshift to deliver seamless, high-performance customer experiences.
- Oversaw the successful **Beta launch of Connect-Web**, orchestrating a staged rollout to onboard over **25,000 Coaches**; implemented **Okta-based authentication and authorization** using industry-standard **OIDC flows**, ensuring secure, compliant access for Coaches across the platform.
- Built and deployed an internal **AI-powered business intelligence agent** using **LLMs, RAG, Tool Calling, and vector databases**, enabling employees across the organization to interact with enterprise data through natural language, compare Coach performance, analyze revenue and growth trends, and reduce reliance on engineering teams for ad-hoc analytics.

Software Engineer

Jul 2019 – Jul 2021

Neustar, A TransUnion Company

Bangalore, India

- Led and executed **full-stack development** for Neustar's OneID products, leveraging Java, SpringBoot, Python, Django, React.js and Docker. Enhanced **product performance by 25%** and streamlined deployment processes with AWS and GCP.
- Architected and implemented the Activation Service, a critical **microservice** within Neustar's IDaaS suite. This service automates GCP Storage bucket creation and IAM policy generation, streamlining data security and access control.
- Engineered **REST APIs** for ETL data ingestion, handling millions of requests daily with **95% uptime**.

PROJECTS

ResumeOptimizer | Python, RAG, LLM, Langchain, Streamlit [\[link\]](#)

June 2024 – Nov 2024

- Built an AI-driven resume optimization tool that customizes resumes based on job descriptions within 10 seconds, reducing manual resume tailoring time by over 70%.
- Leveraged LangChain and LLMs (GPT4, Gemini) to extract keywords, match skills, and generate targeted suggestions to improve resume alignment with job requirements.

RoomieMatch | SwiftUI, Firebase, Java, SpringBoot, MongoDB [\[link\]](#)

Jan 2023 – May 2023

- Designed and developed a cross-functional iOS app that simplifies roommate discovery using Tinder-style swipe mechanics and personalized match suggestions.
- Developed a robust backend using Java, Spring Boot, and MongoDB, exposing secure REST APIs for user matching, group formation, and chat functionality.

TECHNICAL SKILLS

Languages: Java, C++, Python, SQL, JavaScript/TypeScript, HTML, CSS

AI / Generative AI: LLMs, RAG, Agentic Workflows, Tool Calling, Prompt Engineering, LangChain, Semantic Search

Cloud Platforms: AWS (IAM, S3, EC2, Lambda, API Gateway, Redshift, Glue, CloudFront)

DevOps / Infrastructure: Docker, Kubernetes, CI/CD, GitHub Actions

Back-end Technologies: Spring Boot, FastAPI, Microservices, Redis, PostgreSQL, MongoDB, Neo4j

Front-end Technologies: React.js, Next.js, Tailwind, Shadcn, Vite, Redux Toolkit (RTK)

Data Engineering: Apache Spark, Hadoop, Kafka, Delta Lake
